Definitions

**Service**
the series of activities or procedures undertaken by the Authority or its deputy to fulfill customer needs

**Service Manual**
List of services provided by an entity to customers.

**Key Service**
The primary service provided by the Authority followed by a set of sub and amended services.

**Sub Service**
Government services can involve different changes based on the type of customer or service goal. Such services are generally provided by the same process or by making a slight change to it.

**Customer Classification**
Process of dividing customers into homogeneous groups (categories) with different needs, properties or behaviors, including their understanding of the way with which they are treated and how it impacts them.

**Service Description**
A brief explanation about the service

**Process / Service Steps**
The main process of service delivery

**Service Delivery Channels**
Any means of communication or interaction between customers and the Authority through which the customer can access the required services

**Time Required to Get the Service**
The time period from accepting the customer service request to fulfilling the request for the desired service

**Target Audience**
The target customer group of the service

**Service Fees**
Money paid by the customer to be provided with a service

---

**Service Manual Targets**

- Document and list services provided through service channels in the TRA to the different customers
- Define and describe the provided services by the TRA
- Classify the service and group services into categories
- Determine service conditions and requirements
- Identify procedures and steps for submitting applications
- Determine service limitation
- Identify service delivery channels and services provided by each channel
- Time required to be provided with a service
Area of Implementation

This manual shall be applied to the various service delivery channels of the TRA.

- **TRA departments providing services**
- **The TRA consists of 3 sectors and 14 departments:**

### Service Delivery Channels

#### Service Centers

- **Head office**-Abu Dhabi-Al Salam St.
- **Dubai office**-Al Wahida St.- Al Mamzar

- E-mail [info@tra.gov.ae](mailto:info@tra.gov.ae)

- **Post office box**
  - PO Box: 26662 Abu Dhabi, United Arab Emirates
  - PO Box: 116688 Dubai, United Arab Emirates

- **Telephone contact**
  - Contact center: **80012**

- **Fax**
  - Abu Dhabi, United Arab Emirates Fax: +971 2 61182209

- **Social Media**
  - @THEUAETRA
Customer Classification

Clients in the TRA are categorized into 4 groups:

- Government categories
  Include federal and local entities of the emirate’s government

- Business sector
  Various private or public organizations or companies

- Individuals
  All members of the community having a direct relationship with TRA

Service Categories and Types

Service categories are divided into 3 types:

- Government Services:
  Services provided by federal entities to other government entities whether federal or local

- Services for the Business Sector:
  Services provided by the federal government to the business sector.

- Services for Individuals:
  Services provided by the federal government to individual customers.

Maritime services

Service Description

Maritime Ship
The Ship Radio License required as a mandatory document to be carried onboard, this license authorizes the installation and use of maritime radio and associated equipment, on a named ship, subject to applicable license conditions. The ship must be registered in the UAE with the Federal Maritime Authority (FTA). A Ship Radio License also assigns the ship a radio identity in the form of its call sign and MMSI. TRA Regulations on Maritime Radio System can be referred for details.

Fishing Boats
A special small boat authorization only issued to boats registered with the UAE Ministry of climate change and environment and authorizes the installation and use of maritime radio and associated equipment, on a named trawler, subject to applicable authorization conditions. TRA Regulations on Maritime Radio System can be referred for details.

Shore to Ship
This authorization allows use of authorized radio station by entities e.g. shipping agents, port authorities, etc. to communicate with Vessels to:

- Communicate on Commercial matters using an assigned maritime channel.
- Communicate on ports and harbors to support port operations and ship movement.
- Communicate for search and rescue purpose.

TRA Regulations on Maritime Radio System can be referred for details.

Radionavigation
Automatic Identification System (AIS) is a data system whereby ships transmit information relating to the vessel to other AIS stations repetitively and also on interrogation by other AIS stations including shore stations, thereby making themselves known to other ships and shore stations. TRA Regulations on Maritime Radio System can be referred for details.
For individuals.

1. PMR on-board ship

For Business and Government Sector

1. Maritime Ship
2. Shore to Ship
3. Radionavigation
4. PMR on-board ship

Government

**Service Requirements**

- Your contact details: (Full name, contact number, email address);  
- Your ID: Copy of valid emirates ID (both sides), or copy of valid passport; for companies: Copy of power of attorney and business license  
- Complaint reference number provided by the service provider:  
- Disputed account number (mobile number, landline, internet username, etc.);  
- Written description about the complaint;  
Any supporting documents (copies of all correspondences from the service provider, invoices, etc.);

**Service Steps**

The consumer must follow these steps:

- File a complaint with your service provider according to its consumer complaint procedures. Where the service provider must:  
  • Notify the consumer about receiving the complaint  
  • Provider the consumer with a case number  
  • Investigate the complaint in a reasonable time and inform the consumer about the final outcome.

- In the event that the consumer is not satisfied with the outcome or if there is no outcome then the consumer can escalate the complaint to the TRA along with the required documents to settle it according to TRA’s Consumer Dispute Resolution Procedures by:

  - Submitting a complaint through the different service delivery channels  
  - Attach customer ID/ Business license for companies  
  - Attach supporting documents of the complaint (if any)  
  - Receive a solution to the complaint

- Request reopening the case when there are new evidences or dissatisfaction with the provided resolution

### G2G Connectivity

**Service Description**

FedNet provides connectivity between government entities, which enables a seamless and secure interconnected network where Government entities can share data over the encrypted Federal Government Private MPLS Cloud. Government Entities can securely publish and consume services from each other once the connection is established.

Federal government entities can request for the services by communicating FEDnet service desk through the available channels. Local government entities should reach the service through local eGovernment, which will communicate FEDnet service desk.

</thead>
<tbody>
<tr>
<td><strong>Service Description</strong></td>
</tr>
<tr>
<td>SmartPass allows users to access UAE Government services using a single account. Users just need to authenticate once to access multiple on-line Government e-services. The vast majority of UAE Government Services are available online. Without SmartPass, each UAE Government e-service requires a username and password to use the e-services.</td>
</tr>
</tbody>
</table>

Consequently, a user needs to memories, or document, his username and password for all e-services that he can access. Having to memories, or document, multiple and different usernames and passwords often leads to situations where a user cannot access the desired e-service, due to forgotten passwords, or user accounts being blocked because of failed login attempts. The only solution is to unblock a username, and to choose a new password. Unblocking a username only reinstates access to a specific e-service. It does not solve the issue of having to memories, or document, multiple usernames and passwords. UAE Government e-services, enabled by SmartPass, accept the username and password that are stored in SmartPass. Therefore, in order to access UAE Government e-services, a user only needs to memories his SmartPass username and password.

### MPLS Connectivity

### Service Description

FEDnet connectivity provides a connection between Government Entities and FEDnet Datacenters where enables Government entities to access FEDnet provided services or other connected government entities using secure connectivity. Government Entities can securely publish and consume services from each other once connected to FEDnet cloud. Entities can be connected to FEDnet infrastructure through a dedicated physical link (MPLS) or virtual network technology (VPN). The communication mechanism is determined based on the FEDnet team’s assessment.

Secure Internet

Service Description

FEDnet provides Secure Internet Connectivity to Federal Government entities through a dual Internet Service Provider (ISP) Solution allowing for high throughput and redundancy.

The Internet Service provides a consolidation of internet connections across Federal Entities. This reduces the perimeter against intruder attacks by limiting the public vulnerability point to just one Internet Gateway, as the FEDnet is the main internet service provider to the federal entities, which leads to 99.99% service availability throughout the year, and saves the entities the service costs.

**Penetration test & vulnerability assessment**

**Service Description**

The Vulnerability Assessment service helps organizations (entities) to quickly identify all vulnerabilities and weaknesses on the targeted servers or network devices or web application. The service delivers adequate mitigation recommendations for the identified vulnerabilities. If the assets are not public a VPN connection is required. Therefore, for the Penetration Testing it doesn’t stop at simply uncovering vulnerabilities, it goes to the next step to manually exploit those vulnerabilities in order to provide a proof of concept for the real world attack vectors against an organization assets.

### Infrastructure as a service

#### Service Description

FEDnet provides convenient, on-demand access to a shared pool of configurable computing resources (e.g. networks, servers and storage). With a centralized deployment model, compute and storage resources can be rapidly provisioned and released with minimal management effort or service provider interaction. The overall objective is to create a more agile federal enterprise where services can be provisioned on demand to meet government compute requirements.

### Accredited Registrar Technical Support Service

**Service Description**
Provide the necessary technical information to the accredited registrars and respond to their inquiries.

**Service Package**
NA

**Service Category and Type**
Auxiliary Service - Transactional

**Service Time**
Respond in Two working days

**Target Audience**
Business

**Service Requirements**
Accredited Registrar

**Service Steps**
Communicate with .ae Domain Administration (.aeDA) through website, email or phone

### Email as a Service

**Service Description**
Email as a Service is the Shared email service offered to Government Entities, which provides a centralized email environment based on Microsoft Exchange 2013. It provides a self-service portal for the entities to manage their email accounts.

**Service Package**
NA

**Service Category and Type**
Variation Service - Transactional

**Service Time**
1 working day

**Target Audience**
Government
FedNet provides connectivity between government entities, which enables a seamless and secure interconnected network where Government entities can share data over the encrypted Federal Government Private MPLS Cloud.

Government Entities can securely publish and consume services from each other once the connection is established.

Federal government entities can request for the services by communicating FEDnet service desk through the available channels. Local government entities should reach the service through local eGovernment, which will communicate FEDnet service desk.
### Service Delivery Channels

FEDnet Service Desk:
800FEDNET
servicedesk.fednet.gov.ae
servicedesk@fednet.gov.ae

### Service Fees

No Fees

### SmartPass Registration

**Service Description**

SmartPass allows users to access UAE Government services using a single account. Users just need to authenticate once to access multiple online Government e-services. The vast majority of UAE Government Services are available online. Without SmartPass, each UAE Government e-service requires a username and password to use the e-services. Consequently, a user needs to remember, or document, his username and password for all e-services that he can access. Having to remember, or document, multiple usernames and passwords often leads to situations where a user cannot access the desired e-service, due to forgotten passwords, or user accounts being blocked because of failed login attempts. The only solution is to unblock a username, and to choose a new password. Unblocking a username only reinstates access to a specific e-service. It does not solve the issue of having to remember, or document, multiple usernames and passwords. UAE Government e-services, enabled by SmartPass, accept the username and password that are stored in SmartPass. Therefore, in order to access UAE Government e-services, a user only needs to remember his SmartPass username and password.

MPLS Connectivity

Service Description
FEDnet connectivity provides a connection between Government Entities and FEDnet Datacenters where enables Government entities to access FEDnet provided services or other connected government entities using secure connectivity. Government Entities can securely publish and consume services from each other once connected to FEDnet cloud.

Entities can be connected to FEDnet infrastructure through a dedicated physical link (MPLS) or virtual network technology (VPN). The communication mechanism is determined based on the FEDnet team’s assessment.

Secure Internet Connectivity to Federal Government entities through a dual Internet Service Provider (ISP) Solution allowing for high throughput and redundancy.

The Internet Service provides a consolidation of internet connections across Federal Entities. This reduces the perimeter against intruder attacks by limiting the public vulnerability point to just one Internet Gateway, as the FEDnet is the main internet service provider to the federal entities, which leads to 99.99% service availability throughout the year, and saves the entities the service costs.

## Penetration test & vulnerability assessment

### Service Description

The Vulnerability Assessment service helps organizations (entities) to quickly identify all vulnerabilities and weaknesses on the targeted servers or network devices or web application. The service delivers adequate mitigation recommendations for the identified vulnerabilities. If the assets are not public a VPN connection is required. Therefore, for the Penetration Testing it doesn’t stop at simply uncovering vulnerabilities, it goes to the next step to manually exploit those vulnerabilities in order to provide a proof of concept for the real world attack vectors against an organization assets.

### Infrastructure as a service

**Service Description**

FEDnet provides convenient, on-demand access to a shared pool of configurable computing resources (e.g. networks, servers and storage). With a centralized deployment model, compute and storage resources can be rapidly provisioned and released with minimal management effort or service provider interaction. The overall objective is to create a more agile federal enterprise where services can be provisioned on demand to meet government compute requirements.
